

Rotary Disc Rubber Cutting Machine

This rotary disc cutting machine is designed for processing natural, reclaimed, compound, and synthetic rubber. It cuts rubber blocks into smaller blocks, slices, granules, and bars.

Product Overview

Versatile output options including blocks, slices, granules, and strips.

High-Performance Rotary Disc Rubber Cutting Machine

This industrial-grade, rotating-disc cutting machine is engineered for high-efficiency processing of natural, synthetic, compound, and reclaimed rubber. Its robust design facilitates the cutting of rubber bales into various forms, including blocks, slices, granules, and bars, while also accommodating other material types. The system utilizes a hydraulic mechanism for controlled, precise operation and self-lubricating moving parts to ensure longevity and minimal maintenance requirements.

Technical Specifications

Machine Specifications

Feature	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Rotational Speed	50r/min	50r/min
Power Rating	4+2.2kw	4+2.2kw
Working Pressure	5Mpa	5Mpa
Production Capacity	2t/h	3t/h

Performance Metrics

50 r/min
Blade Speed

5 Mpa
Operating Pressure

Key Features

Detailed view showing the cutting guide, worktable, and hydraulic control components.

Primary Advantages

- Advanced rotating-disc cutting technology
- Hydraulic-controlled reciprocating worktable
- Versatile material processing capabilities
- Self-lubricating moving parts for extended life
- Optimized for high-production rubber manufacturing

Supported Materials

Natural Rubber, Compound Rubber, Reclaimed Rubber, Synthetic Rubber
