

Rotary Hammer Drill

This rotary hammer drill operates on a 230V-50Hz power supply with 900W input power. It has a 20mm drilling capacity and includes a depth gauge and side handle.

Product Overview

Professional Rotary Hammer Drill

This high-performance rotary hammer drill is engineered for demanding drilling and light demolition tasks. With a robust 900W motor, it delivers consistent power for efficient material penetration. Designed with user control in mind, it includes an adjustable depth gauge for precision and a side handle for stability during operation.

Technical Specifications

Input Power	900 W
Rated Voltage	230V~ 50Hz
Drilling Capacity	20 mm
No-Load Speed	1100 r/min

Features

Included Accessories

- Depth gauge for precise drilling
- Side handle for enhanced control

Applications	Drilling, Demolition
