

Rotary Hammer Drill

This is a professional-grade rotary hammer drill designed for heavy-duty applications. It delivers powerful impact energy for efficient drilling and demolition in concrete, masonry, and other tough materials.

Overview

Professional Rotary Hammer Drill

This 26mm rotary hammer drill is engineered for heavy-duty drilling and light demolition tasks. Powered by an 800W motor, it delivers consistent impact energy of 3.0 Joules, making it highly effective for concrete and masonry work. With its versatile SDS-PLUS clamping system and dedicated chiseling function, this tool is designed to handle demanding construction and renovation environments efficiently.

Performance Metrics

Input Power

800 W

Input Power

3 J

Impact Force

Operating Speed

Metric	Range
Rated Speed	0 - 1150 rpm
Hammer Rate	0 - 5100 bpm

Drilling Capacity

Maximum Drilling Capacity

- Steel: 13 mm
- Wood: 30 mm
- Concrete: 26 mm
- Masonry (Hollow bit): 68 mm

Best Drilling Range	8 - 16 mm
