

Rotary Laser Power Adapter

This power adapter converts AC power to the DC voltage required for operating rotary lasers. It delivers 5V DC at 2000mA through a standard AC plug and DC barrel connector.

Product Overview

Professional Power Solution

This high-performance rotary laser power adapter is engineered for reliability and consistent power delivery. Featuring a durable, compact design, it is built to withstand demanding job site conditions. The unit ensures safe operation and efficient charging through advanced built-in electrical protections.

Technical Specifications

Output Metrics

5 V DC

Output Voltage

2000 mA

Output Current

Protection Systems

- Advanced electrical circuit protection
- Stable DC output delivery

Model Identifier

ABT005

Design Features

Interchangeable AC plug, Compact Design, Durable Construction
