Product Overview

Versatile Pasture Maintenance Solution

The 9G series rotary mower is a robust agricultural implement specifically designed for cleaning and slashing in bush, grassland, and uneven ranch environments. Its scientific design ensures durability and high performance while remaining easy to operate and maintain for professional farmers. With adjustable cutting heights and a PTO-driven mechanism, it provides a clean and even cut across various terrains, making it an ideal choice for large-scale vegetation management.

Key Performance Metrics

Performance Highlights

3 Point

Linkage Type

540 RPM

PTO Driven

Technical Specifications

Standard three-point hitch allows for easy attachment to a wide range of agricultural tractors.

Reliable power transfer via a heavy-duty PTO shaft for consistent cutting performance.

Model Specifications Comparison

Model	Cutting Width (mm)	Cutting Height (mm)	Weight (kg)	Matched Power (HP)
9G-1.0	1000	100-300	260	18-30
9G-1.5	1500	100-300	362	25-55
9G-1.8	1800	100-300	410	45-70

Mounting System

3-point rear mounted

Adjustable Cutting Height

Yes

Design & Safety

The heavy-duty construction includes a safety chain curtain to contain debris during high-speed operation.

Multiple high-speed blades ensure a uniform cut across challenging terrains.

Construction Features

- Heavy-duty steel deck construction
- Reinforced ribs for added frame strength
- Protective chain curtain to prevent debris scattering
- High-speed rotating blades for clean regrowth
- Yellow powder-coat finish for corrosion resistance
- Shielded driveline components for operator safety

Applications

Suitable Environments

Pastures, Orchards, Bushland, Grassland, Roadside Verges, Uneven Ranch Land
