Product Overview

Professional Backing Pad Solution

This high-quality backing pad is engineered for optimal balance and smooth operation, significantly reducing vibration to enhance user comfort during extended use. Featuring a secure hook and loop fastening system, it ensures rapid and reliable attachment of polishing and sanding pads. Designed for versatility, this tool is an essential component for automotive detailing, woodworking, and various professional material removal applications.

Technical Specifications

Rotary Max Speed

4500 RPM

Max Speed

Random Orbital Max Speed

12000 RPM

Max Speed

Disc Compatibility

6 inch

Features

Key Features

- Hook and loop fastening system
- Balanced design for reduced vibration
- Durable construction for long-lasting performance
- Optimized for automotive detailing and woodworking

Applications

Automotive Detailing, Woodworking, Material Removal, Sanding, Polishing
