Overview

High-Efficiency Rotary Packaging

This 8-station rotary premade bag packing machine is engineered for the automated, high-speed packaging of diverse products. Designed with a robust stainless steel construction, it ensures durability and hygiene standards necessary for food, pharmaceutical, and chemical production environments. The system integrates precise multi-head weighing with a flexible rotary indexing mechanism to minimize waste and maximize operational accuracy.

Applications

Compatible Bag Types

- Stand-Up Pouch
- Hand Pouch
- Zipper Pouch
- Four Side Sealing Pouch
- Three Side Seal Pouch
- Paper Pouch
- M Pouch
- Laminated Pouch

Suitable Products

Candy, Hard Nut, Raisins, Peanuts, Melon Seeds, Chips, Chocolate, Biscuits

Technical Specifications

Material

Stainless Steel

Core Features

- Rotary indexing system
- Multi-head weigher integration
- Precise filling parameter adjustment
- Adjustable sealing time
- User-friendly control interface
