Product Overview

High-Performance Rear Crankshaft Seal

This rotary shaft oil seal is engineered for demanding automotive and machinery environments, specifically designed for diesel engine applications. Featuring a robust metal housing and a high-grade elastomeric sealing lip, it provides a reliable barrier against oil leakage. The multi-tiered sealing element ensures enhanced durability and performance under varying pressure conditions.

Technical Specifications

OE Reference Number	2418F704
Part Name	Rear Crankshaft Oil Seal
Marking	24131-704

Application & Logistics

Engine Compatibility	Diesel Engine
Minimum Order Quantity	200 pcs
