

Rotary Slasher Gearbox

This gearbox is designed for rotary slashers and agricultural machinery. Its compact design allows for easy integration into various slasher models while ensuring smooth operation and extended service life.

Overview

Robust Agricultural Power Transmission

The GTM-A77 is a high-performance gearbox specifically engineered for rotary slashers and heavy-duty agricultural machinery. Built to withstand harsh operating environments, it features a durable housing and precision-engineered internal gears that ensure reliable power transmission. Its compact design facilitates seamless integration into various slasher models, while the pre-lubricated system promotes smooth operation and an extended service life.

Technical Specifications

Key Design Features

- Durable housing construction
- Precision-engineered gears
- Splined output shaft
- Compact form factor
- Lubricated for extended service life

Model Number	GTM-A77
Primary Application	Rotary Slasher, Agricultural Machinery

Performance

Operational Durability

Heavy Duty • Harsh Environment Ready
