Overview

A robust rotary slasher mower designed for heavy-duty vegetation management, featuring front safety chains and a durable deck.

Rotary Slasher Mower

This rotary slasher is designed for efficient vegetation management, perfect for cutting high weeds, bushes, and rougher vegetation in fields. It features high-speed parallel blades for a clean cut and robust construction to ensure stability and durability during operation. Equipped with front protection chains, it effectively prevents debris splashing, making it a reliable choice for agricultural and landscaping tasks.

Technical Specifications

Model Comparison

Model	Cutting Width (mm)	Weight (kg)	Matched Power (hp)
SM-1.2	1200	180	18-30
SM-1.5	1500	220	45-60
SM-1.8	1800	280	45-60
SM-2.1	2100	360	60-80

Cutting Height Range

100 mm

Linkage System

Three point semi-mounted

Key Features

Operational Advantages

- Suitable for bushes and rougher weeds
- High-speed parallel blade cutting system
- Durable and stable construction
- Front protection chain to prevent splashing
