

Rotary Spray Bit for CFA and SCP Piles

This rotary spray bit is designed for continuous flight auger (CFA) and soil cement pile (SCP) applications. The bit facilitates the efficient mixing and injection of cement or other binding agents into the soil during drilling.

Product Overview

Rotary Spray Bit for CFA and SCP Piles

This specialized rotary spray bit is engineered for Continuous Flight Auger (CFA) and Soil Cement Pile (SCP) applications. Designed to facilitate efficient soil mixing and cement slurry injection, it enhances ground stabilization and load-bearing capacity. The robust construction features strategically positioned cutting teeth for optimal penetration and durability in demanding drilling conditions.

Technical Specifications

Key Design Features

- Integrated spray nozzles for uniform cement distribution
- Robust cutting teeth for effective soil penetration
- Side door access for grouting
- Durable construction for demanding environments

Primary Applications

CFA Drilling, SCP Piles, Soil Stabilization, Foundation Construction

Customization

Yes
