Product Overview

Versatile Soil Preparation

This offset rotary tiller is designed for small farms, vineyards, orchards, and vegetable crops. Its sturdy construction combined with a low power requirement makes it an excellent match for light tractors. It features a reliable single-speed gearbox and chain drive system for efficient soil aeration and seedbed preparation.

Technical Specifications

Gearbox Speed	540 rpm
Rotor Revolutions	254 rpm
Three-point Hitch	Cat. I
Blades per Flange	4
Drive System	Side Chain drive

Certifications & Compliance

Safety Standards	CE, Safety Guards
