

Rotary Tiller for Soil Preparation

This product is designed for hard work and site preparation in agriculture. It is mainly used for rotary operations in dry land and paddy fields.

Product Overview

Professional Agricultural Tillage Solution

This diesel-powered rotary tiller is a robust machine designed for intensive soil preparation in both dry land and paddy fields. It features an efficient all-gear drive system that minimizes power loss while providing high-quality tillage across diverse terrains. Built for longevity and reliability, the machine incorporates a high-intensity ductile iron gearbox and a flexible wet-friction clutch system to ensure smooth operation.

Technical Specifications

Tillage Width	1350 mm
Tillage Depth	100 mm
Weight	132 kg
Productivity	50 ha/h
Power Source	Diesel

Performance Features

Operational Capabilities

- Pumping
- Power generation
- Spraying
- Trenching
- Earth moving
- Short-distance transport

Ideal Environments

Dry Land, Paddy Fields, Orchards, Vegetable Gardens, Tea Plantations, Tobacco Fields
