Product Overview

Professional Soil Preparation

The IGNA series rotary tiller is a versatile agricultural tool engineered to meet the needs of small and medium-sized farms. Its robust construction delivers consistent results even in challenging soil conditions while optimizing tractor power consumption. This series excels in seedbed preparation, effective weed control, and the seamless integration of organic matter or fertilizers into the soil profile.

Technical Specifications

Available Working Widths

- 135
- 150
- 180
- 200
- 220
- 230

Mounting Type

Three-point hitch

Key Components

Heavy-duty gearbox, Adjustable depth control, High-quality tines

Performance

Primary Applications

Seedbed preparation • Weed control • Soil pulverization • Fertilizer incorporation
