

Rotary Tiller

This is a motorized agricultural machine used for soil cultivation. It utilizes rotating tines or blades to break up and aerate the soil.

Product Overview

High-Performance Rotary Tiller

This motorized rotary tiller is designed for efficient soil cultivation, making it an essential tool for agricultural and gardening tasks. It features robust rotating tines that effectively break up and aerate soil, promoting better planting conditions. With user-friendly adjustable handles and a dedicated transport wheel, this machine offers both operational control and ease of movement across various terrains.

Key Features

Core Capabilities

- Soil cultivation and aeration
- Motorized operation
- Adjustable handle system
- Integrated transport wheel

Machine Type	Rotary Tiller, Rotavator, Power Tiller, Rotary Hoe
--------------	--

Technical Specifications

Power Source	Gasoline Engine
Motorized	Yes
