

Rotating Disc Rubber Cutting Machine

This rotating-disc type cutting machine is designed for processing natural, reclaimed, compound, and synthetic rubber. It cuts rubber blocks into smaller blocks, slices, granules, and bars, and can also process other materials.

Overview

Professional Rubber Cutting Solution

This rotating-disc cutting machine is engineered for the high-efficiency processing of natural, synthetic, compound, and reclaimed rubber. Designed to transform large rubber blocks into manageable slices, granules, bars, or smaller blocks, it ensures high precision and consistent performance. The machine incorporates hydraulic systems and self-lubricating components to minimize friction, enhance durability, and significantly reduce the requirement for manual labor.

Performance Metrics

RAW MATERIAL • PRODUCTS

We not only have professional products but also have an excellent effect

Raw Material

Products

The machine provides precise, consistent dimensions to improve overall production quality.

Key Performance Indicators

50 r/min

Blade Speed

5 Mpa

Working Pressure

Technical Specifications

Model Specifications Comparison

Feature	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Production Capacity	2t/h	3t/h
Power Requirement	4+2.2kw	4+2.2kw

Compatible Materials

Natural Rubber, Synthetic Rubber, Compound Rubber, Reclaimed Rubber

Design & Construction

Highlighted structure showing the worktable, water cooling box, and control panel for precision cutting.

Output Forms

- Blocks
- Slices
- Granules
- Bars
