Product Overview

Heavy-Duty Rotating Warning Beacon

This high-performance rotating beacon is engineered for demanding industrial, mining, and construction environments. Utilizing a reliable halogen H1 bulb, the unit provides a bright, 360-degree warning signal to enhance safety. Designed for versatility, it supports both 12V and 24V electrical systems and features a durable construction with an IP65 protection rating.

Technical Specifications

Standard rotating beacon unit showing the halogen bulb assembly.

IP Rating
IP65

Working Voltage 12V / 24V

Light Source H1 Halogen Bulb

Materials Aluminum Alloy Base, ABS Base, PC Lens, Silicone Drive

Warranty 12 months

Application & Features

Beacon demonstrated in a practical vehicle application.

Recommended Usage

- Utility Trucks
- Construction Vehicles
- Pilot Cars
- Pickup Trucks
- Tractors
- Farm Machinery

Product Advantages

- Quiet operation via silicone drive rotator
- DIN-mount base models for rapid transfer
- High visibility rotating beam
- Rugged design for hazardous environments

Models

Available color variants including red, blue, amber, and green.
