Overview

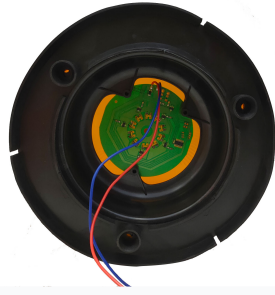

High-visibility amber lens with rotating mechanism for 360-degree coverage.

High-Visibility Mining Warning Light

This rotating warning light is specifically engineered for the demanding environments of mining and industrial operations. Featuring a robust PS cover and a flexible rubber base, it provides reliable 360-degree visibility to enhance site safety. With IP56 waterproofing and dual-voltage compatibility, it is an essential safety component for heavy-duty vehicles and equipment.

Technical Specifications

Internal circuit board and wiring showing the robust DC power connection.

Waterproof Rating

IP56

Operating Voltage

DC 12V, DC 24V

Connection

Two wires

Materials & Construction

Durable amber lens designed for high visibility in industrial environments.

Materials

- PS (Polystyrene) Cover
- Rubber Base

Physical Dimensions

240 mm

Total Height

222 mm

Base Diameter

220 mm
