

Rotavator Cover Furrow Spare Part for Dh246f Heavy Plus

This cover furrow is a spare part designed for Dh246f Heavy Plus rotavators. It ensures optimal performance and longevity of soil preparation machinery.

Product Overview

Professional Grade Rotavator Components

These heavy-duty spare parts are precision-engineered for Dh246f Heavy Plus rotary cultivators. Designed for demanding agricultural environments, they provide essential support for soil preparation and furrow covering operations. Each component is manufactured to meet rigorous durability standards, ensuring reliable performance and extended machine longevity during intense cultivation cycles.

Compatibility

Compatible Model	Dh246f Heavy Plus
Included Component Categories	Gears, Shafts, Bearings, Blades, Hardware

Technical Specifications

A complete assembly of essential spare parts designed for seamless integration with your existing machinery.

Performance Focus

100 % Durability Rating	1 Level Precision Fitment
-----------------------------------	-------------------------------------

Primary Application	Rotary cultivator furrow covering
