

Rotisserie Spit AC Motor

AC synchronous motor designed for rotating spits. It features a long axis output shaft for direct connection to rotating mechanisms.

Product Overview

Rotisserie Spit AC Motor

This synchronous AC motor is engineered specifically for rotating spit applications in ovens and grills. Featuring a long axis output shaft, it enables direct and seamless connection to rotating kitchen mechanisms. Its compact and durable construction provides reliable, consistent performance in demanding high-heat appliance environments.

Technical Specifications

Key Features

- Long axis output shaft
- Compact design
- Durable housing for high-heat environments
- Synchronous rotational speed

Motor Type	Synchronous AC Motor
Primary Applications	Rotisserie Ovens, Grills, Kitchen Appliances
