Product Overview

Intelligent Remote Water Measurement

The LXSYY series is a multi-jet rotor liquid sealing water meter designed for precision and durability in water flow measurement. It features an intelligent remote monitoring capability and a split-structure wireless module, facilitating seamless data access and efficient resource management. With its high-quality mechanism and liquid-sealed counter, this meter ensures long-term reading clarity and reliable performance across various residential, commercial, and industrial applications.

Technical Specifications

Body Material

- Brass
- Steel (spray-paint)

Installation Orientation

Horizontal

Technology

Multi-jet

Design Features

Key Features

Liquid Sealed Counter, Remote Monitoring, Split-Type Module, Plug-and-Play, Externally Adjustable
