Product Overview

High-Efficiency Disc Plough

This fully-suspended disc plough is engineered for superior soil cultivation, featuring rotary motion discs that effectively manage weeds, crop stems, and frictional soil containing debris. Designed for compatibility with four-wheel tractors, it ensures a smooth operation without grass winding or blockages. Its adjustable design allows operators to fine-tune performance based on specific field requirements, making it an essential tool for primary tillage.

Technical Specifications

Performance Metrics

40 hp

Minimum Power Required

120 hp

Maximum Power Required

Model Specifications

Model	Working Width (mm)	Discs	Weight (kg)
1LY-2	600	2	350
1LY-3	900	3	400
1LY-4	1200	4	470
1LY-5	1500	5	560

Working Depth

250 mm

Linkage System

Three-point suspension II type

Key Features

Operational Advantages

- No grass winding or blockages
- No heap building-up
- Easy cutting of crop stalks
- Adjustable disc angle
