Overview

High-Performance Disc Plough

This fully-suspended disc plough is engineered for efficient soil preparation and cultivation, specifically designed for use with four-wheel tractors. Its rotary disc motion ensures effective soil turning, making it ideal for challenging terrains including fields with weeds, crop stems, and frictional soil containing bricks. The design prevents grass winding and blockage, ensuring consistent performance during primary tillage.

Technical Specifications

Linkage Type	Three-point suspension II type
Working Depth	275 mm
Key Performance Features	No Winding Grass, Anti-Blockage, Adjustable Angle, Crop Stalk Cutting

Model Variants

Model Specifications

Model	Working Width (mm)	Discs	Weight (kg)	Matched Power (hp)
1LY-2	600	2	350	40
1LY-3	900	3	400	60
1LY-4	1200	4	470	80
1LY-5	1500	5	560	120
