

Round Electric Space Heater with Safety Grill

This electric heater features a safety grid and a heat reflector. It has a 3-meter power cord and a switch for general use.

Product Overview

Efficient Heating Solution

This round electric space heater is designed for safe and reliable performance in professional environments. It features a robust metal housing with a protective safety grill, ensuring durability while preventing accidental contact with heating elements. The unit is engineered to operate without consuming oxygen, maintaining air quality in closed spaces, and includes a heat reflector for optimized warmth distribution.

Technical Specifications

Controls

- General Switch Off
- Dual Switch System

Power Cord Length

3 m

Safety Features

Safety Grid, Oxygen-Safe, Heat Reflector

Design

Housing Construction

Round metal housing with ventilation slots
