

Round Head Hammer with Wooden Handle

This round head hammer is designed for striking and shaping applications. Its wooden handle offers a comfortable grip and reduces vibration.

Product Overview

Professional British Style Round Head Hammer

This British-style round head hammer is expertly designed for versatile metalworking, shaping, and general striking applications. Featuring a durable head with a professional black paint finish, it is engineered for consistent performance and longevity in demanding work environments. The ergonomic wooden handle ensures a comfortable and secure grip, effectively dampening vibration during repetitive use.
