

Round Inlay Backlit LED Panel Light

This slim panel light features a DOB driver solution and a round, inlay mounting design. Compared to sidelit panels, the backlit design offers enhanced brightness and an efficacy of 100 lumens per watt.

Overview

High-Efficiency Slim LED Lighting

The RPL7 series is a slim-profile backlit LED panel light featuring a reliable DOB (Driver on Board) solution. Designed for inlay mounting, this round panel offers a modern aesthetic and superior brightness compared to traditional sidelit alternatives. With a high luminous efficacy of 100 lm/w, it serves as a perfect energy-efficient replacement for standard aluminum panel lights.
