

Round Nose Pliers with Insulated Handles

These round nose pliers are made from carbon steel and chrome plated. They feature transparent insulated handles for user safety.

Product Overview

Professional Precision Tools

These round nose pliers feature a long, tapered design specifically engineered for forming precise loops and smooth bends in wire. Constructed from durable carbon steel with a professional chrome-plated finish, they offer excellent resistance to wear and corrosion. The transparent, insulated handles ensure a secure grip and enhanced safety for use in electronics repair, jewelry making, and other precision applications.
