

Round Point Digging Shovel with Fiberglass Handle

This round point shovel is designed for gardening and landscaping. It features a long fiberglass handle for increased leverage and reduced strain.

Product Overview

Professional Grade Digging Solution

This round point digging shovel is engineered for heavy-duty landscaping and construction tasks. Constructed with a high-strength carbon steel head and a reinforced fiberglass handle, it ensures maximum durability and resilience. The ergonomic dual-injection grip provides enhanced comfort and control, making it an ideal choice for professional-grade earth moving, planting, and digging applications.
