

# Round Profile Bending Machine

This round profile bending machine is designed for precise metal forming of round profiles. It utilizes multiple rollers to achieve accurate bending angles and radii, suitable for various metal types and thicknesses.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Round Profile Bending Machine

The ERBM10V is a high-durability electric bending machine designed for precision metal fabrication. Featuring a robust cast body and high-quality hardened steel rollers, it is engineered for consistent performance under industrial conditions. This versatile tool can be equipped with various mold wheels to meet diverse profile bending demands, significantly improving workshop efficiency through its 1.1KW motor-driven system.

## Technical Specifications

### Motor Power

**1.1 KW**

Motor

### Bending Capacity

Size (mm)	Min Diameter (mm)
20x5, 30x10	190
20x5, 50x10	160
10x10, 20x20	160

## Physical Dimensions

### Weight

- Net Weight: 230 kg
- Gross Weight: 280 kg

### Packing Dimensions

95 x 80 x 135 cm

## Construction Quality

### Compliance

CE • ISO

### Construction Materials

Hardened Shafts, Hardened/Grinded Rollers, Cast Machine Body, Carbon Structural Steel
