

# Round Thread Die Set

These machine and hand round thread dies conform to DIN223 UNC/UNF standards. They are made with a ground process and HSS materials, suitable for use on steel, cast iron, and other soft metals.

## Overview

### Professional Grade Round Thread Dies

These DIN223 standard round thread dies are engineered for both machine and hand operation, providing versatility for various threading tasks. Constructed from high-speed steel (HSS) with a precision-ground manufacturing process, they ensure durability and consistent performance. Suitable for processing steel, cast iron, and other soft metals, these dies are available in multiple surface treatments to suit different industrial requirements.

## Technical Specifications

Manufacturing Process	Ground
Material	High-Speed Steel (HSS)
Surface Treatment	White, Titanium Nitride-Plated, Titanium Aluminide Nitride-Plated
Compatible Materials	Steel, Cast Iron, Soft Metals
Standard	DIN223

## Size Availability

### Available Thread Types

- UNC
- UNF
- NPT

UNC/UNF Size Range	No.0-80UNF to 2-4-1/2NC
NPT Size Range	NPT1/16-27 to NPT2-11-1/2
