

# Rubber Block Cutting Machine

This rotating-disc type cutting machine is designed for processing various types of rubber. It cuts rubber blocks into smaller blocks, slices, granules, and bars.

## ADDITIONAL IMAGES

## Product Overview

[ ABOUT PRODUCT ]

[ PRINCIPLE • FUNCTION ]

**MAIN PRINCIPLE**

This rotating-disc type cutting machine is designed for natural rubber, synthetic rubber, compound rubber, and reclaimed rubber. It is capable of transforming large rubber blocks into slices, granules, or bars, making it an essential component for rubber manufacturing facilities seeking consistent output and durability.

## Industrial Rubber Block Cutting Solution

This rotating-disc cutting machine is engineered for the high-efficiency processing of natural, synthetic, compound, and reclaimed rubber. Designed to minimize manual labor, the system features a robust hydraulic worktable that delivers precise, uniform cuts. It is capable of transforming large rubber blocks into slices, granules, or bars, making it an essential component for rubber manufacturing facilities seeking consistent output and durability.

## Technical Specifications

### Model Comparison

Specification	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Blade Speed	50r/min	50r/min
Power Rating	4+2.2kw	4+2.2kw
Working Pressure	5Mpa	5Mpa
Production Capacity	2t/h	3t/h

## Key Features

「 DETAILED • STRUCTURE 」

Appears In The Detail Contributes To Extraordinary Quality

### Output Shapes

- Blocks
- Slices
- Granules
- Bars

### Operational Efficiency

**50 r/min**

Rotational Speed

**5 Mpa**

System Pressure

### Compatible Materials

Natural Rubber, Synthetic Rubber, Compound Rubber, Reclaimed Rubber
