

Rubber Block Cutting Machine with Rotary Disc

This rotating-disc type cutting machine is designed for processing various rubber types. It cuts rubber blocks into smaller pieces, including slices, granules, and bars, and can also handle other materials.

Product Overview

Rotating-Disc Rubber Cutting Technology

This rotating-disc cutting machine is engineered for the high-efficiency processing of natural, synthetic, reclaimed, and compound rubber materials. It facilitates the conversion of large rubber blocks into versatile forms including slices, granules, bars, and smaller blocks. Designed for industrial durability, it delivers precision cutting and high throughput to enhance manufacturing productivity.

Technical Specifications

Available Models

Feature	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Rotational Speed	50r/min	50r/min
Power Rating	4+2.2kw	4+2.2kw
Working Pressure	5Mpa	5Mpa
Capacity	2t/h	3t/h

Process Capabilities

Compatible Materials	Natural Rubber, Synthetic Rubber, Reclaimed Rubber, Compound Rubber
Output Shapes	Blocks, Slices, Granules, Bars
