

Rubber Caster with Nylon Core for Manual Forklifts

This rubber caster is designed for manual forklifts. It features a nylon core for enhanced strength and stability.

Product Overview

Industrial Strength Performance

This high-performance rubber caster is engineered specifically for manual forklifts in demanding industrial environments. The combination of a durable rubber tread and a high-strength nylon core provides smooth, reliable movement while effectively reducing noise and vibration. Designed for heavy-duty applications, it offers superior wear and abrasion resistance, ensuring a long service life even under intensive daily use.

Technical Specifications

Key Dimensions

180 mm

Wheel Diameter

50 mm

Tread Width

140 mm

Mounting Height

Materials Used

Rubber Tread, Nylon Core

Features & Benefits

Key Operational Benefits

- Enhanced impact resistance
- Excellent dimensional stability under load
- Reduced operational noise and vibration
- Chemical resistance

Application Environment

Heavy-duty • Industrial • Indoor/Outdoor
