Overview

High-Efficiency Rubber Crushing Solution

This multifunctional crushing machine is engineered for high-output processing of various rubber materials. Designed for durability and consistent performance, it features low-speed crushing technology that extends tool life while ensuring effective material reduction. The machine offers adjustable outlet specifications, making it a versatile solution for recycling and processing facilities handling natural and synthetic rubber products.

Key Features

Key Advantages

High Output, Long Tool Life, Low-Speed Crushing, Adjustable Outlet, Multifunctional

Application Scope

Suitable Materials

- Natural Rubber
- Synthetic Rubber
- Latex Products
- Car Inner/Outer Tubes
- Water Rings
- Shoe Soles
- Gaskets
- Rubber Factory Waste
- Sealing Fins
- Conveyor Belts
