Product Overview

High-Performance Industrial Sealing Solutions

These precision-engineered rubber O-rings are designed for demanding sealing applications across automotive, plumbing, and mechanical systems. Constructed from high-quality elastomeric compounds, they offer superior resistance to extreme temperatures, acids, and alkalis. Available in a wide array of international standards, these components ensure reliable, leak-proof performance for sensors, connectors, and diverse industrial machinery.

Technical Standards

Supported Standards

AS568, JIS B 2401, BS1516, PGO, GBO, GB 1235, GB/T3452, DIN 3771, ASTM D 2000, SAE J200

Technical Specifications

Material Properties

High Temperature Resistance • Acid-Alkali Resistance • Anti-aging • Non-toxic • Odorless

Minimum Thickness

0.6 mm

Product Range

Available Rubber Products

- O-rings
- Rubber seals
- Rubber bands
- Oil seals
- Water seals
- Rubber gaskets

Customization & OEM

Yes
