

Rubber Parking Curb with Reflective Strips

Durable rubber parking bumpers are designed to protect vehicles and structures from impact. High-visibility yellow reflective strips enhance safety.

Overview

Heavy-Duty Parking Protection

These durable rubber parking curbs are engineered to protect both vehicles and structural assets from accidental impact. Designed for high-traffic environments, they feature integrated high-visibility yellow reflective strips to ensure safety in low-light conditions. Their heavy-duty rubber construction offers long-lasting performance, making them an ideal solution for parking garages, loading docks, and commercial parking lots.

Physical Specifications

Material	Heavy-duty rubber
Safety Features	High-visibility reflective strips, Impact resistance

Applications

Recommended Environments

- Parking garages
- Loading docks
- Commercial parking lots
