

Rubber Wheel with Metal Hub

Durable rubber wheel designed for various applications. It features a robust tire with a tread pattern for enhanced grip and a metal hub with precision bearings for smooth rotation.

Product Overview

High-Performance Industrial Wheel

This rubber wheel is engineered for reliability in demanding mobility applications. Featuring a high-quality rubber tire with an advanced tread pattern, it provides excellent grip and traction on various surfaces. The core is built with a sturdy metal hub and integrated precision bearings to ensure smooth, consistent operation for heavy-duty carts and trolleys.

Technical Specifications

Core Features

- Robust tread pattern for grip
- Durable metal hub construction
- Integrated precision bearings

Material Composition

Rubber, Metal

Applications

Common Applications

- Industrial Carts
- Material Handling Trolleys
- General Mobility Equipment
