

Rubber Wrapped Mesh Filter

This cap filter features a mesh screen encased within a durable rubber wrapping. The rubber wrapping provides a secure and tight fit, preventing leakage and ensuring efficient filtration.

Product Overview

High-Performance Rubber Wrapped Mesh Filter

This cap filter features a high-quality mesh screen precision-encased within a durable rubber wrapping. Designed for robust filtration applications, the rubber housing ensures a secure, tight fit that effectively prevents leakage and maintains system integrity. Its specialized construction makes it an ideal component for demanding industrial or automotive filtration environments.

Technical Specifications

Application Type

Filtration • Gasket

Dimensions (U-)

23.5*18*2.5*12.3

Material Composition

Rubber, Mesh
