

# RV Dome Light 12-24V LED

This 12-24V RV dome light features a single, efficient LED light source. Designed for interior illumination in recreational vehicles, it provides bright and reliable lighting with low power consumption.

## Product Overview

### Efficient RV Interior Lighting

This 12-24V LED dome light is designed specifically for interior illumination in recreational vehicles. Featuring a durable housing and integrated on/off switch, it offers a reliable and modern lighting solution for mobile environments. With its low power consumption and bright output, it is an ideal upgrade for any RV interior setup.

## Technical Specifications

### Power Consumption

**3.5 W**

Max Power

Voltage Range	10 V - 24V
Brightness	280 Lumens
LED Configuration	24PC SMD 2835

## Features

### Switching

Integrated ON/OFF Switch

Light Source	LED
