

RVV Sheathed Flat Flexible Cable

This RVV series cable is designed for use in household appliances and small electrical instruments. It is also suitable for dynamic lighting and controlling power cords.

Product Overview

Professional Flexible Cabling Solution

The RVV sheathed flat flexible cable is engineered for versatility and reliability in demanding electrical environments. Utilizing twisted strands of plain copper conductors, this cable provides excellent conductivity while maintaining superior flexibility for complex installations. Protected by high-grade PVC insulation and a robust outer sheath, it ensures long-term durability and safety for your professional wiring requirements.

Technical Specifications

Rated Voltage

300 V

U₀

500 V

U

Max Operating Temperature

70

Materials and Construction

Conductor Material	Plain copper wire strands
Insulation and Sheath Material	PVC Insulation, PVC Sheath

Standards and Certification

Compliance Standards

IEC • EO227 • 53
