

Saddle Mount Cable Ties

Saddle mounting ties are designed to secure cables, wires, or hoses to surfaces using screws or bolts. Featuring an integrated mounting base, they allow easy attachment to panels or frames, ensuring secure and organized routing.

Product Overview

Professional Cable Management Solution

Saddle mount cable ties are specialized fasteners engineered for secure and organized routing of cables, wires, and hoses. Featuring an integrated mounting base, these ties allow for direct attachment to panels, frames, or structures using a screw or bolt. Designed for versatility, they provide a stable platform that ensures bundles remain firmly in place within automotive, electrical, and industrial environments.

Key Features

Primary Applications

- Automotive
- Electrical
- Industrial

Material

Nylon, Durable Plastic

Technical Specifications

Base Design

Pre-drilled hole • Integrated base • Saddle platform

Mounting Style

Screw or bolt attachment via integrated saddle base
