Product Overview

Secure Anti-Theft Protection

This versatile security device is engineered for both motorcycles and bicycles, providing a robust solution for disc brake locking. Constructed from high-quality alloy, it offers reliable protection against unauthorized movement. Its design emphasizes both durability and ease of use, making it an essential tool for securing vehicles in various environments.

Physical Attributes

Material	Alloy
Color Options	Color to order

Compatibility & Use

Compatible Vehicles	Motorcycle, Bicycle
Locking Mechanism	Disc Brake Lock

Key Features

Security Features

- High-visibility finish options
- Robust alloy construction
- Includes key mechanism
- Standard disc brake fit
