Product Overview

Sustainable Emergency Lighting

This innovative emergency lantern provides reliable illumination by utilizing salt water or brine as a power source, eliminating the need for traditional batteries. Designed for versatility and durability, it features 10 super bright LEDs and offers an impressive 120-hour runtime. It is an eco-friendly, pollution-free lighting solution perfect for camping, outdoor exploration, and emergency power failure situations.

Technical Specifications

Runtime

120 hours
Duration

Light Source

10 Super Bright LEDs

Power Source

Salt Water, Brine, Urine

Key Features

Key Characteristics

- Waterproof design
- Eco-friendly and pollution-free
- Low cost operation
- High energy density
- Simple battery structure
- Portable with integrated handle

Usage Scenarios

Ideal Applications

Camping • Mountain Climbing • Emergency Power Failure • Anchoring • Outdoor Hiking
