

Sanding Sheets for Wood and Metal

These sanding sheets are designed for use on wood, metal, and other surfaces. They are available in multiple grits for rough sanding, general sanding, and final finishing.

Product Overview

Professional Sanding Solutions

These versatile sanding sheets are engineered for high-performance material removal and surface finishing on wood, metal, and plaster. Featuring durable construction, they resist tearing to ensure consistent abrasive results across a wide range of tasks. Designed to accommodate professional needs, these sheets provide effective solutions for everything from initial rust removal to final surface smoothing.

Technical Specifications

Available Grits & Usage

Grit	Application
60	Rough sanding, rust removal, and stripping old finishes
120	General purpose sanding
240	Final finishing and surface preparation

Supported Materials

Wood, Metal, Plaster

Usage Guidelines

Usage Recommendations

- Use the complete surface area of the sanding pad for efficiency
- Occasionally rotate the accessory to distribute wear
- Avoid applying excessive pressure; allow the tool to perform the work
- Ensure smaller workpieces are securely clamped or fastened
