

Sanding Sponge Blocks for Metal Plastic Wood

Sanding sponge blocks are designed for use on metal, plastic, and wood. They are available in various sizes and grits for both dry and wet sanding applications.

Product Overview

Professional Grade Sanding Sponge Blocks

These versatile sanding sponge blocks are engineered for efficient surface preparation on metal, plastic, and wood. Designed to support both dry and wet sanding applications, the sponges are fully washable for extended service life. The blocks are available in various dimensions and grit configurations, featuring either two-sided or four-sided sanding surfaces to accommodate diverse finishing requirements.
