

Sandpaper Roll

Sandpaper rolls are used for sanding applications. The rolls can be used on wood, metal, and other materials.

Product Overview

Versatile Sanding Solution

These professional-grade sandpaper rolls are designed for high-performance sanding, polishing, and finishing across a wide array of industrial applications. With compatibility for various surfaces and materials, they serve as an essential tool for woodworking, metalworking, and automotive manufacturing. The assortment of grits and colors ensures that every stage of surface preparation, from coarse material removal to fine finishing, can be addressed with precision.

Industrial Applications

Woodworking, Metalworking, Automotive

Technical Features

Application Scope

- Surface sanding
- Polishing
- Finishing

Available Formats

Rolls • Discs
