Product Overview

Professional Sanitary Plumbing Pliers

These specialized sanitary plumbing pliers are engineered for gripping and turning pipes and fittings without damaging delicate or finished surfaces. Featuring a high-quality drop-forged and hardened steel construction, they ensure long-lasting durability for demanding plumbing tasks. The adjustable joint design and smooth, wide jaws provide the versatility and protection needed for installing bathroom and kitchen fixtures, including chrome and plastic components.

Technical Specifications

Construction Method	Drop Forged, Hardened Steel
Jaw Design	Smooth, non-serrated jaws for surface protection
Size Range	56-67 mm
