

Sanitary Stainless Steel Stub End Fitting

This sanitary stub end fitting is designed for hygienic process systems. It is constructed from 316L stainless steel, ensuring corrosion resistance and durability, and includes a flared flange for secure connections.

Product Overview

Sanitary Stub End Fitting

This sanitary stub end fitting is engineered for high-performance use within hygienic process systems. Crafted from premium 316L stainless steel, it provides exceptional corrosion resistance and long-term durability in demanding environments. The design features a flared flange to ensure a secure and reliable connection with compatible piping components.
