

Satellite Dish Antenna

This high-performance satellite dish antenna is designed for receiving television and data signals. It features a parabolic reflector for signal focusing and a robust mounting system for stability.

Product Overview

High-Performance Satellite Solution

The HL-C180 satellite dish antenna is engineered for high-performance signal reception, catering to both television and data communication needs. Featuring a precision parabolic reflector, it ensures optimal signal focusing even in demanding environments. This robust system provides reliable connectivity and stability, making it an ideal choice for diverse residential and commercial applications.

Technical Specifications

Model Number	HL-C180
Applications	Residential, Commercial, Television Signal, Data Communication

Design and Build

Design Features

- Parabolic reflector design
- High-performance signal focusing
- Robust mounting system
- Weather-resistant construction
