

Satellite Dish Antenna

This satellite dish antenna is designed for receiving satellite signals. It features a parabolic reflector to focus radio waves onto the feedhorn and LNB.

Product Overview

Professional Grade Satellite Reception

This satellite dish antenna is engineered for high-performance signal reception in satellite television and communication applications. It utilizes a precision-engineered parabolic reflector to focus incoming radio waves onto the feedhorn for optimal signal integrity. Built with rugged, weather-resistant materials, it ensures consistent operation in demanding outdoor environments.

Technical Specifications

Included Components

- Parabolic Reflector
- Feedhorn
- LNB (Low Noise Block downconverter)
- Adjustable Mounting Stand

Design Type	Parabolic Reflector
Application Suitability	Satellite Television, Communication Systems, Outdoor Use

Mechanical Construction

Durability

Weather-resistant • Outdoor Rated

Mounting Features	Adjustable stand for precise alignment
